

AARYAN BASTOLA

About Me

Forward-thinking Information Technology student specializing in Artificial Intelligence, Machine Learning, and AWS cloud deployments. Passionate about leveraging technology to drive innovation and architect scalable Computer Vision solutions. Collaborative developer equipped with strong communication and teamwork skills to translate complex technical requirements into efficient, problem-solving applications.

Skills

- AWS
- Github
- Ms word Office Tools
- CyberSecurity
- Ethical Hacking
- Gen AI

Language

English

Nepali

Technical Projects

Hand Gesture Recognition Web Application | Computer Vision, AI, Web Integration

- Accomplished real-time gesture tracking capabilities as measured by low-latency video input processing, by engineering a localized machine learning backend.
- Formulated a seamless user experience by integrating the computer vision engine with a lightweight, responsive web frontend.
- Architected a clean code structure for local testing environments, laying the groundwork for future cloud-based AWS deployments.

IT & Automation Foundations | Security, Design, Collaboration

- Explored principles of Cyber Security and Ethical Hacking to secure application logic and mitigate potential vulnerabilities.
- Optimized multimedia presentations and UI/UX mockups utilizing Canva Design and 3D modeling concepts.
- Fostered highly collaborative environments during academic projects, demonstrating effective communication to achieve team objectives.

Education

International American University 2024-Present

Bachelor of Information Technology

Kathmandu Model College

2022 – 2024

+2 Management with Computers

Projects

Hand-gesture
